KNX SCALE OF FEES
FOR PRODUCT QUALIFICATION AND CERTIFICATION[1]
APPROVED BY THE KNX MANAGEMENT BOARD 02/06

1. Basic Fee

Type of certificate	Case	Fee	charged
Main Certificate	A	€ 600	For the registration of any hardware developed by the applying member company or licensee [equivalent to one catalogue entry in ETS[2])
	B	€ 180	For the registration of any software developed by the applying member company or licensee
	C	€ 30	For the registration of any additional products in an existing main product group [equivalent to additional catalogue entries in ETS]
	D	€ 30	- Recombination of an already registered product with an already registered application and vice versa - Attribution of an already registered application to a new product - Reassessment of registered/certified products without retesting (e.g. ETS starter applications, non-certification relevant update of ETS plug-ins…)
	E	€ 30[3]	For each combination of a hardware-software <u>already</u> registered/certified according to a legacy standard, if former certification covers all relevant requirements of KNX standard. If not, see cases A to D
Derived Certificate	A	€ 180	For the registration of any hardware developed by a member company or licensee other than the applying company [equivalent to one catalogue entry in ETS]
	B	€ 60	For the registration of any software developed by a member company or licensee other than the applying company
	C	€ 16	For the registration of any additional products in an existing derived product group
	D	€ 16	- Recombination of an already registered product with an already registered application and vice versa - Attribution of an already registered application to a new product
	E	€ 16	For each combination of a hardware-software <u>already</u> registered/certified according to a legacy standard, if former certification covers all relevant requirements of KNX standard. If not, see cases A to D
Adaptation of version of bus coupling unit	-	€ 180	- For the registration of any hardware which had previously been registered for another medium [e.g. TP1 device update to PL132) - For the registration of any hardware which had previously been registered with another mask version type [e.g. update of product from BCU1 to BCU2]

- For initiating the procedure and providing certification support to the applicant
- This fee is payable at the date of registration of the product data in the ETS database (if applicable).

---

[1] This Scale of fees applies to members of the KNX Association only.
[2] Only applicable for KNX/EIB Certification
[3] In case the applicant does not provide a copy of the PIXIT Header, this fee is tripled.

2. Audit fee

Type of Audit	Fees	excluding
Pre-license Inspection: assessment of applicant's Quality Management System according to ISO 9001	€ 1000 per person (minimum two persons, minimum two days)	travel expenses, living allowance and hotel accommodation

- covers expenses for the KNX system audit (= examination and evaluation of the applicant's Quality Management Handbook and relevant documentation), preparation of the audit (submission of an audit plan), executing the KNX implementation audit and a detailed audit report after the implementation audit
- the Pre-License inspection is **not** carried out when the applicant can submit a copy of QMS Certificate of an accredited body together with a copy of its quality manual.

3. Product testing fees

- Consult one of the Accredited test labs (see https://www.knx.org/knx-en/community/test-labs/list/index.php)
- For tests, for which no uniform KNX test specifications exist, carried out by the KNX Certification Department via witness testing at the applicant's premise, the following hourly rate is charged **€125** (excluding travel expenses, living allowance and hotel accommodation)

4. Annual Surveillance Fee   €75 per certified main product group

- covers expenses for the surveillance of the certified KNX products (carried out by KNX accredited test labs on KNX' instigation)
- These expenses are charged at the end of each year.

All prices are exempt from Belgian V.A.T. for any company outside Belgium, provided KNX has the applicant's V.A.T. number.
